

## EVAN LANG

### GRADUATED FROM EDGAR HIGH SCHOOL IN 1989

After graduating from Edgar High School in 1989, Evan attended Wyoming Technical Institute and graduated in 1990 with a vocational diploma in diesel and heavy equipment technology and is the president and owner of E.L.M. Repair and Refrigeration Inc.

In 1996, Evan and his wife began doing auto repairs from their home garage. In 2002, they purchased a small, 3-bay garage in Edgar and renovated it to begin and grow their business. Over the next few years the business grew, so in 2006 they decided to add an additional 3 bays to the facility. As business continued to expand, the decision was made to design a brand new facility with an impressive layout and appearance, but most importantly the desired functionality. Conveniently located just off Hwy 29, they are able to accommodate semi-trucks, trailers, farm tractors, combines, other farm equipment, off-road equipment and logging equipment, but specializes in diesel performance work, offering a 24-hour mobile repair service.

ELM. Repair & Refrigeration is a family-owned and operated full-service diesel repair shop located in Edgar, Wisconsin. Evan has expanded employment opportunities in the community for high tech occupations. As an inspiration to students, Evan has shown that hard work and dedication as well as superior professionalism leads to success.

Evan has three children, Faith, Jonah and Hanna, and resides in Edgar with his wife, Mary.
